SELECTED CLIENTELE

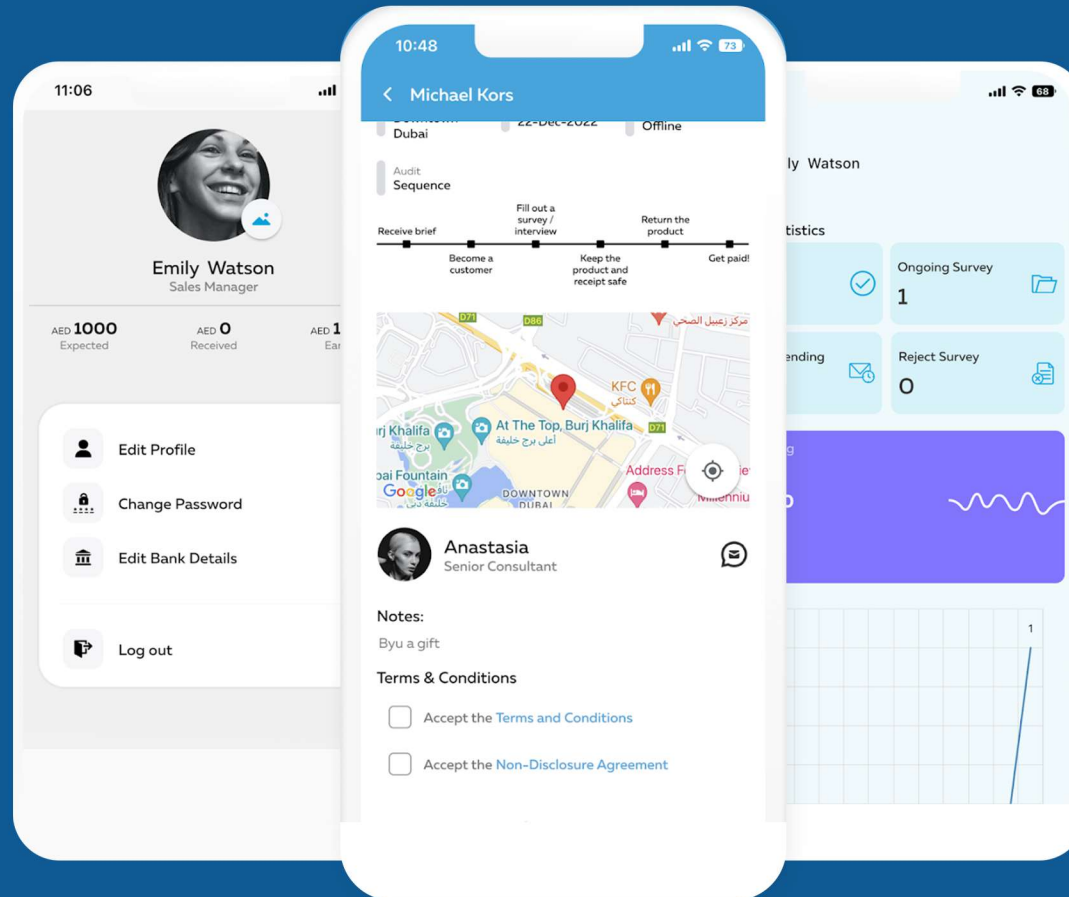

The image features a white background with abstract, flowing blue lines at the top and bottom. These lines are composed of many thin, overlapping curves that create a sense of movement and depth. The lines are a vibrant blue color and vary in opacity, with some areas appearing more solid and others more translucent. The overall effect is a modern, clean, and dynamic design.

CASE STUDY

Mysterya

| 130 Business Days Engagement |

During the initial conversation, the client proposed an app development project based on the concept wherein users get an opportunity to earn some extra cash by participating in a USD survey. We took this idea forward and gave it the shape of Mysterya Shopping app. Keeping in mind industry standards and specific client requirements, we successfully designed this app with interactive UI/UX and a robust backend.

MYSTERYA DEVELOPMENT STORY

Idea

User-Friendly

Responsive

Creators

Our app development team combined the client's concept with the best tools and technologies to create Mysterya Shopping app. The app comprises a power-packed backend with an admin panel and required features. This app demonstrates the best UI/UX, secure features and smooth integration of third-party tools.

KEY FEATURES

HOME SCREEN

- The home screen will allow users to view surveys sent by the admin under various categories. Users can view details like price, description and an option to view in detail.

SURVEY

- After accepting the survey, users will receive the location for a survey and will have to make a call to that store or can pay a visit to take the survey.

GET REWARDED

- Users can fill in all the questions and submit the survey while following all the instructions carefully. Users will get paid after completion and can see total earnings and points in the profile.
